

IBRAHIM S

Data Scientist — Data Analyst

☎ +91-8904747425 ✉ ibrahims86x@gmail.com [in linkedin.com/in/ibrahim—s](https://www.linkedin.com/in/ibrahim—s)

Summary

Data Scientist with a strong foundation in SQL, Python, machine learning algorithms, NLP, Excel, Power BI. Skilled in cleaning, analyzing, building machine learning models, and visualizing data to generate insights and support data-driven decision-making. Seeking opportunities to apply analytical skills in dynamic, fast-paced environments.

Skills

Programming & Querying: SQL, Python, Machine Learning, Mathematics and Statistics

Frameworks: TensorFlow, PyTorch, Sci-kit, Seaborn, Keras

Data Visualization Tools: Advanced MS Excel, Power BI, Tableau

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Descriptive Statistics

Experience

Data Analyst Intern

May 2026 – Present

Bluestock Fintech

Remote

- Developed ETL workflows to ingest, validate, and process mutual fund and financial market datasets using Python, Pandas, and Excel.
- Performed data profiling and quality checks by analyzing missing values, duplicates, schema consistency, and AMFI scheme code validation across datasets.
- Integrated live mutual fund NAV data through financial APIs and transformed raw data into structured formats for analysis and reporting.
- Conducted exploratory data analysis on mutual fund datasets including fund master records, NAV history, AUM trends, SIP inflows, and benchmark performance while managing projects using Git and GitHub.

Projects

Stock Price Prediction | *Python, Keras, LSTM, Streamlit*

Jun 2025 – Oct 2025

- Built a machine learning model using LSTM networks to forecast short-term stock price movements, integrating moving average-based features to enhance trend detection.
- Created a clean and interactive UI in Streamlit enabling users to input stock symbols, visualize historical trends, and view model-generated predictions in real time.
- Successfully generated next-day price predictions, demonstrating functional forecasting capability, though accuracy was limited due to market volatility.

Kyber-Based Post-Quantum Cryptography Implementation | *Python, Raspberry Pi*

Aug 2025 – Nov 2025

- Developed modules for key generation, encapsulation, and decapsulation, enabling secure key exchange between devices over a local Raspberry Pi-based setup.
- Integrated Python-based Kyber libraries to perform lattice-based cryptographic operations, ensuring compliance with NIST-approved PQC standards.
- Configured a Raspberry Pi environment to handle real-time cryptographic operations, testing the algorithm's performance on low-power hardware.

Awards & Certifications

- **Microsoft Data Analytics Certificate – Great Learning (2025):** Finished 4 practical case studies involving SQL, data cleaning, Excel and EDA.
- **Research Paper Publication – IJERT Journal (2025):** Published a group research paper in IJERT (International Journal of Engineering Research and Technology), presenting the practical implementation of the CRYSTALS-Kyber post-quantum algorithm using Python and Raspberry Pi.

Education

B.E Electronics and Telecommunication Engineering

Graduate: 2026

Dr. Ambedkar Institute of Technology, Bangalore

CGPA: 6.79 / 10
